WONJONG KIM

Software Engineer | wonvom.github.io

EDUCATION

Oregon State University | 2022.09.12 - 2024.03.22

Master of Science / Computer Science | GPA 3.83 / 4.0 | Degree awarded 2024.03.22

Dankook University | 2014.03.03 - 2021.02.19

Bachelor of Science / Computer Engineering, minor in Business Administration | GPA 3.54 / 4.5

TECHNICAL SKILLS

Java, Python, TypeScript, HTML, CSS, JavaScript, JSP, React, Next.js, NestJS, Spring, REST APIs, PostgreSQL, Prisma, SQL, Oracle, MySQL, MS SQL Server, BigQuery, Jupyter, PyTorch, Git, Docker, AWS, Swift, Xcode, SQLite FTS5, RAG

PROFESSIONAL EXPERIENCE

ONF Company | Assistant Manager, IT Application Developer | Mar 2026 - Present

- Owned the internal system's overall design and implementation with Codex assistance; used by five employees.
- Connected reference data for 32 products to pricing, shipment requests, transaction statements, clients, tracking, and settlement.
- Implemented operational workflows with Next.js, NestJS, TypeScript, Prisma, PostgreSQL, and Docker.
- Created about 500 NAMU query tests. Updated the intent parser to handle a request for two products' sizes and prices, then rechecked the answer.
- Improved unshipped-product handling and statement layouts from staff feedback. Verified changes on a separate port before after-hours updates.
- Confirmed in October 2026: zero system-related shipping errors across six operating months.

Operating period: 6 months

LSP LLC | Inspection & Data Engineer, Ultium Cells site | 2024.05.29 - 2026.02.27

- Operated electrode insulation-thickness inspection equipment and supported initial package-process inspection checks.
- Automated inspection-log extraction and analysis with Python, reducing the same recurring task from about three days to 30 minutes.
- Matched inline and offline data by lot, selected valid operating segments, and removed zero values and Z-score outliers.
- Compared old and new formulas on the same cleaned evaluation data: MAE 1.372μm to 0.521μm, about 62% lower.
- Analyzed MES records for over-detection and missed defects and shared findings with production, quality, and inspection teams.

Military Service | Sergeant, Republic of Korea Army | Dec 2014 - Sep 2016

Completed active-duty service as a firearms instructor at Korea Army Academy at Yeongcheon.

WONJONG KIM

PROJECT EXPERIENCE

Lily Personal Assistant | Personal project

- Stored long-term memories in LilyWiki Markdown and searched documents and sentence fragments with SQLite FTS5.
- Implemented selective retrieval based on request intent and wording, then read original documents into the answer model's context.

BigQuery Aviation Data Exploration | Academic project

- Removed missing-latitude rows and queried COUNT(DISTINCT Icao) within coordinate ranges. Material records 4,588 input rows and 107 filtered distinct values.
- Implemented Sort-Merge Join separately for learning, without directly integrating it into BigQuery.

Full-Stack Home Shopping Service | Mar 2021 - Aug 2021

- Connected Spring backend, web, Android, iOS, and database layers for product browsing, details, cart, and order flows.

Data Science Lab Tourism Recommendations | Mar 2019 - 2020.07.10

- Collected, cleaned, and visualized KT BigSight, TourAPI, and Korea Tourism Organization data. Supported Saltlux Tornado materials and React web implementation.

AR Campus Navigation | Jan 2019 - Dec 2019

- Built a drone-image-based campus model with MetaShape and connected Unity with mobile environments.
- Received a team Excellence Award at the 2019 Capstone Design competition.

DCGAN International Collaboration | Jul 2019 - Aug 2019

- Implemented a PyTorch DCGAN with the Brno University of Technology team, structured generator/discriminator networks, and compared generated images across epochs.

ACTIVITIES

Red Beanz programming academic club | 2014 - 2020. President in 2019, organizing Java fundamentals, example exercises, code reviews, and learning activities.
