

WONJONG KIM

Seoul, South Korea | +82 10-9790-4680 | knowjo94@gmail.com | wonvom.github.io

EDUCATION

Oregon State University — Corvallis, Oregon, USA

Sep 2022 — Mar 2024

Master of Science / Computer Science / GPA : 3.83(4.0)

Dankook University — Yongin, South Korea

Mar 2014 — Feb 2021

Bachelor of Science / (Major) Computer Engineering, (Minor) Business Administration / GPA : 3.54(4.5)

TECHNICAL SKILLS

Java, Python, TypeScript / HTML, CSS, JavaScript, JSP / Next.js, React, NestJS, Spring, REST APIs /
PostgreSQL, Prisma, SQL, Oracle, MySQL, MS SQL Server, BigQuery / Jupyter, PyTorch / Git, Docker, AWS

PROFESSIONAL EXPERIENCE

ONF Company — Assistant Manager, IT Application Developer, Seoul, South Korea

Mar 2026 — Present

- Planned and developed a B2B wholesale product catalog website for customers.
- Integrated product, color, pricing, customer, delivery request, document, settlement, and internal AI query data into a PostgreSQL-based internal operating system.
- Digitalized manual workflows previously managed through spreadsheets, folders, and messenger-based communication into a web-based internal OS.
- Implemented product search, price calculation, delivery request, document storage, status tracking, and settlement functions using Next.js, TypeScript, NestJS, Prisma, PostgreSQL, and Docker.
- Verified approximately 500 test cases before operation, maintained zero system-related delivery errors during the initial three-month operating period, and organized the foundation for SNS promotion.

LSP LLC — Electrode, Package Inspection Engineer & Data Engineer, Ultium Cells, Tennessee, USA

April 2024 — Feb 2026

- Operated insulation film thickness inspection equipment and analyzed inspection data for the electrode process.
- Supported initial equipment installation, inspection standard review, equipment condition checks, and on-site issue response for the package process.
- Automated inspection log extraction and analysis using Python, reducing recurring report preparation time from approximately three days to 30 minutes.
- Matched inline and offline inspection data by production lot and cleaned regression datasets by filtering valid segments, zero-value noise, and outliers.
- Revalidated a Tennessee-specific insulation film thickness correlation formula, improving MAE from 1.372 μm to 0.521 μm and reducing error by approximately 62% compared with the previous reference formula.

ROK Military Service — Sergeant, South Korea Army, South Korea

Dec 2014 — Sep 2016

- Served as a firearms instructor at Korea Army and completed active-duty service as a Sergeant.

PROJECT EXPERIENCE

Data Science Lab — Research Assistant, Dankook University, South Korea

Mar 2019 — July 2020

- Collected, cleaned, and created visualization materials using tourism and public datasets from KT BigSight, TourAPI, and Korea Tourism Organization.
- Prepared tourism data and analysis materials for the Saltlux big data collaboration project "Tornado."
- Participated in a tourism recommendation website project for foreign visitors and worked as the React-based web page developer.

Capstone Design Project — participant, Dankook University, South Korea

Jan 2020 — Dec 2020

- Developed an AR-based campus guidance and navigation application using Android Studio, Unity, Xcode, and MetaShape.
- Created 3D campus models based on drone-captured images.
- Awarded the Excellence Prize at the 2019 Capstone Design competition.

Machine Learning Project — participant, Brno University of Technology, Czech Republic

July 2019 — Aug 2019

- Trained real images using a PyTorch-based DCGAN model and implemented the Generator/Discriminator structure to analyze image comparisons by epoch.

"RedBeans" Programming Academic Club — President, Dankook University, South Korea

Mar 2014 — Jan 2020

- Served as president of the programming academic club in 2019, operating Java fundamentals training, example-solving sessions, code reviews, and subject-based mentoring groups.
- Planned study sessions, managed members, supported project-based learning, and operated academic activities to improve junior members' development skills.
